Plan B: The Show Must Go On

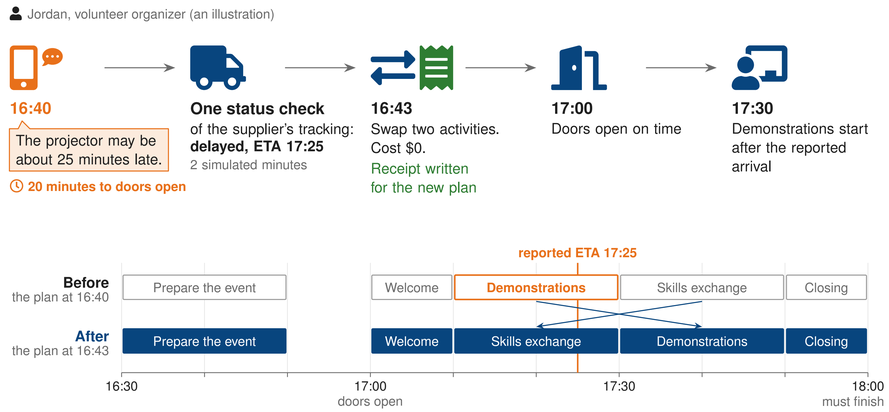

Noctis Zhang

University of Massachusetts Boston • PEAAII Hackathon, October 2026

Plan B helps a community event stay on track by deciding what to verify, what to prepare, and when to commit a change.

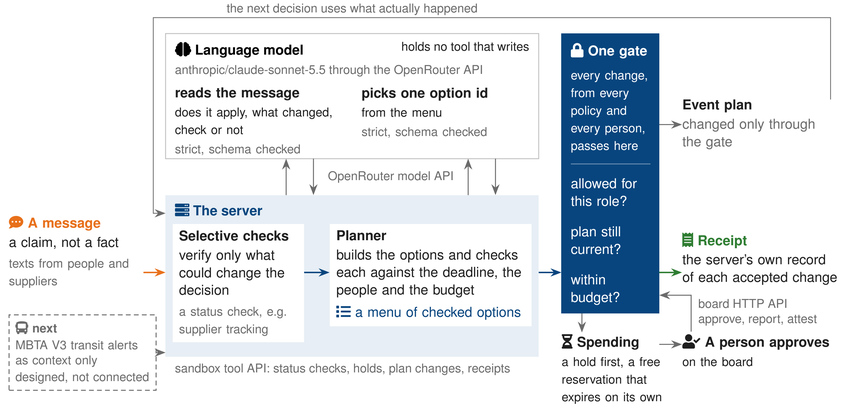

An AI coordinator that checks a message before acting and never spends money without a person.

16:40, twenty minutes to doors open

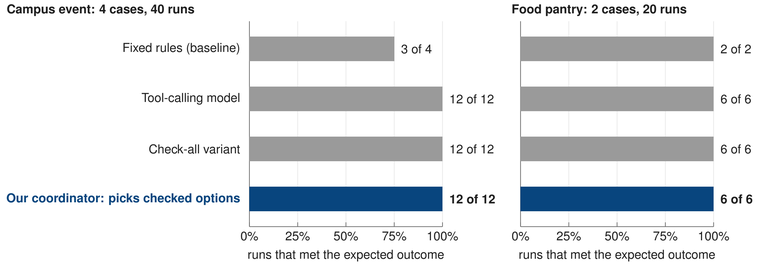

Jordan is an illustration. A simulated event, run in the local sandbox.

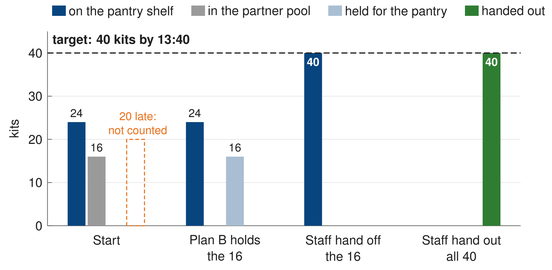

The model only picks checked options. One gate decides.

59 of 60 runs met the expected outcome on 6 new cases

The same loop runs a food pantry

What it means

No executed action broke a rule, because every change passes the one gate. The one miss: the fixed rules, when a volunteer runs late. The new cases repeat situations seen in development, and six cases cannot rank the model approaches.

Next: MBTA transit alerts as context only, designed and not connected. A pilot where Plan B proposes and the organizer acts.
