Plan B, The Show Must Go On

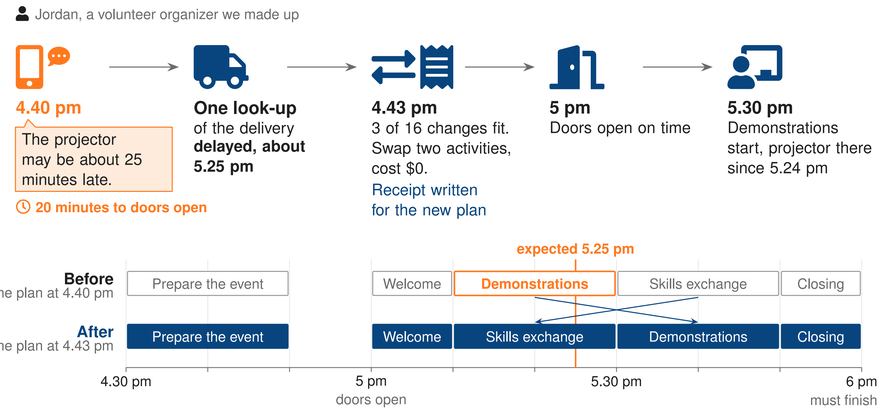

Noctis Zhang and Zhen Lu

Department of Computer Science, University of Massachusetts Boston • PEAAII AI Applications Hackathon 2026, October 2026

Check the fact. Pick only what fits. Leave a receipt.

An AI event coordinator for student clubs and volunteer groups. It checks before it changes anything, and money waits for a person's OK.

4.40 pm, twenty minutes before doors open

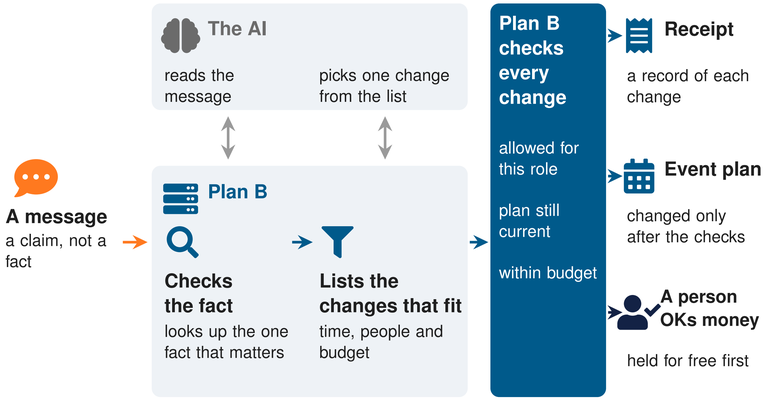

The running board, a rehearsal with no AI

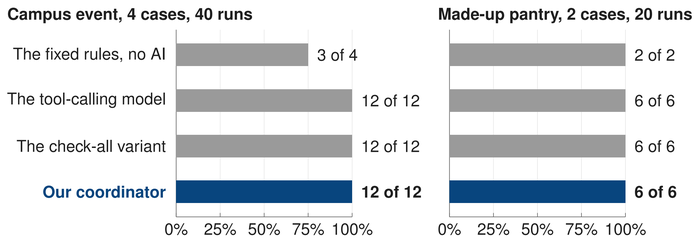

Before and after

ACTIVITY	BEFORE (V1)	AFTER (V2)
Welcome	17:00–17:10 Fixed community room, Event host	17:00–17:10 Fixed community room, Event host
Community demonstrations	17:10–17:30 Fixed community room, Primary projector delivery, Demonstration lead	17:30–17:50 Fixed community room, Primary projector delivery, Demonstration lead
Skills exchange	17:30–17:50 Fixed community room, Skills facilitator	17:10–17:30 Fixed community room, Skills facilitator
Closing	17:50–18:00 Fixed community room, Event host	17:50–18:00 Fixed community room, Event host

The AI picks, and Plan B checks every change

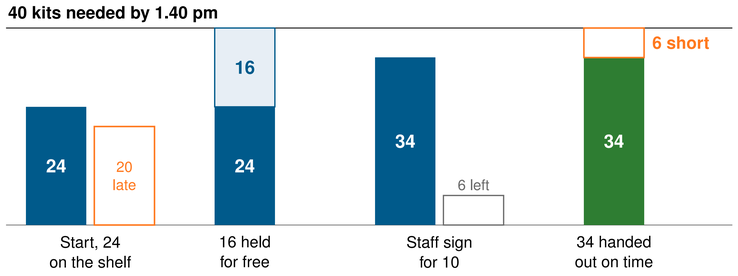

59 of 60 runs met the expected outcome on 6 sealed cases

Made-up days, sealed before the test, each AI design run 3 times. One AI model, no real event yet.

The same checks run a made-up food pantry

Staff sign for only 10 of the 16 held kits, so 6 are short.

Why Plan B, not the tools you use

Today the text lands in a group chat or a shared sheet [11, 12]. We have not tested the other tools named here.

Safer. The three ideas are built in, where in Zapier the user adds the approval step [7].

More flexible. Cvent and Bizzabo build for event teams [2, 3]. Plan B runs campus, community or pantry events on one laptop, with your AI model or none. Free, open source.

More personal. Assistants ask as their makers designed [4, 6]. Here each group writes its own event and spending limit.

Thanks to the PEAAII organizers at UMass Boston. Sources [1] to [37] are in the documentation.
